//EXPERIENCE

//1 TRICK PONY - INTERACTIVE DEVELOPER MAY 2012 - PRESENT

I currently work as a web developer for 1 Trick Pony. I've worked on projects both large and small for clients like American Express, Virgin, Hard Rock Hotels, Turner Classic Movies, and Sony Pictures Classics. I'm used to communicating in a team environment with account managers and other developers. I've taken the lead developer role on several full site builds at 1 Trick Pony and I'm experienced with subversion software.

//PHILADELPHIA UNIVERSITY - WEB DEVELOPER AND DESIGN COORDINATOR JULY 2011 - MARCH 2012

I worked with the university PR staff and assisted wherever needed. I worked mostly on their new website rebuild, and I created a Wordpress theme for a standalone university news site.

//XBACK BRACING SERVICES - WEB DEVELOPER/DESIGNER FEBRUARY 2010 - JUNE 2011

I worked in a part time role and I rebuilt their website twice. I assisted Xback with maintenance issues on the site and I also created an online store for them to explore selling their braces directly to consumers (they primarily sell to doctors and other distributors).

//EDUCATION + AWARDS
