EXPERIENCE

1Trick Pony
Front-End Developer
May 2012 - Present

I currently work as a web developer for 1 Trick Pony. I've worked on projects for clients like American Express, Virgin(Mobile/Hotels/America), Hard Rock Hotels, Turner Classic Movies, and Sony Pictures Classics. I'm used to communicating in a very fast paced team environment with account managers and other developers. I've taken the lead developer role on several builds at 1 Trick Pony and I'm experienced with managing my time and hitting deadlines.

Philadelphia University
Front-End Developer
July 2011 - March 2012

I worked with the university PR staff and assisted wherever needed. I worked mostly on their new website rebuild, and I created a Wordpress theme for a standalone university news site.
